

DALLAS ZOO
Conservation Education Science Center

view walking from parking area across bridge over Cedar Creek towards CESC entry

A new education and science facility is being planned by Oglesby · Greene for the entrance to the Dallas Zoo. This 70,400 sq. ft. structure is to be a teaching laboratory for conservation of the world ecology systems. It will include research, teaching and interpretive facilities as well as serve all arriving visitors to the Dallas Zoo. This sustainable facility is to be LEED certified silver level category.

Contract Amount: Approximately \$15,000,000
 Completion Date: 50% Schematic Design,
 On Hold Pending Funding
 Client: Dallas Zoological Society
