

TEXAS DISCOVERY GARDENS

Strategic Development Plan / Assembly Pavilion

In addition to the upgrading and selective redefinition of the featured "Discovery Gardens" to 'sync' with their current mission, a new 8,500 square foot multipurpose Education Pavilion will be created and anchored at the southern end of the grand allée. It will focus around a central interactive water feature with large covered porches flanking the main facility. The goal is to achieve a LEED Silver rated, sustainable facility. Public restrooms, a catering kitchen, a/v and storage will support the pavilion.
