

40 BRAEWOOD

Dallas, Texas

40 Braewood is located on a wooded bluff above White Rock Creek. Interior public spaces are oriented to the North allowing large expanses of glass and indirect natural lighting. Additional views from the interior are carefully selected and framed to minimize solar heat gain and reduce glare. The exterior spaces and infinity-edge pool are arranged as a series of terraces integrating the structure into the bluff and allowing a seamless visual transition to the site and adjacent nature preserve.

Completed 2008

Owner name and cost withheld at client's request.
